Sound Advantage

Pro-Audio Condenser Microphone

Bring professional broadcast-ready audio quality into your home studio or office. The Sound Advantage Pro-Audio Condenser Microphone is perfect for podcasting, gaming, streaming, and music recording with high-definition sound capturing and playback. Compatible with all major recording software and apps on Windows, Mac, and Linux systems; just plug in and play in without downloading any drivers. Designed with a professional sound chipset for high-frequency sampling rates and an omnidirectional pickup for crystal clear sound and vocal presence from any angle. Minimize distortion and unwanted sounds by attaching the included dual-layer pop filter. Use the protective shock mount and tripod base to make height or angle adjustments without interfering with the sound quality mid-session. Stream, record or perform with high-definition audio.

Great for Zoom, Skype, Google Meet & More!

Plug & Play
