

MAG GRIP

Phone Mount Kit Vent | Dash | Windshield

Snap on. Drive. Snap off. It's really that easy. Featuring MagSafe compatibility for iPhones and MagSafe cases, the Mag Grip Magnetic Phone Mount uses a ring of powerful magnets to hold your phone in a bump-proof grip without all the hassle of a cradle-style mount. Simply hold your phone near the head of the mount and feel the magnetic force instantly grasp on - that's all it takes to keep your phone at eye level and within easy reach for safer navigation, music, and call control behind the wheel. No MagSafe? No problem. Just use the easy peel-and-stick adapter to add compatibility to non-MagSafe cases, older iPhones, and even Android phones.

This 3-in-1 kit has everything you need to find the perfect position anywhere in your car, no matter your make or model. Use the telescopic arm with suction cup base for dashboards and windshields, or use the silicone-padded air vent clip in any slatted dashboard air vent. The mount is fully rotatable for the perfect viewing angle so you can go hands-free and safely stay connected on the road.
