

SpeedBoost

65W USB-C PD GaN Laptop Charger with PPS

This isn't your usual laptop charger. Engineered with a next-gen gallium nitride (GaN) chipset, it packs more fast-charging power into a seriously small size, generates a lot less heat as it operates, and only uses half as much material as a standard silicon-based charger. Clocking in at 51% smaller and 44% lighter than an Apple-original 61W power adapter, this 65W GaN-powered fast charger can boost a MacBook Pro M2 from 0 to 50% in just 40 minutes, or do the same for an HP Envy x360 laptop in as little as 35 minutes! It's universally compatible with all USB-C enabled laptops, and with PPS-enhanced Power Delivery technology, it's also capable of auto-optimizing its output to safely fast charge your tablet, phone, headphones, and even your wireless mouse. Say goodbye to filling your bag with multiple dedicated chargers and a laptop power brick - the ultra-compact SpeedBoost 65W USB-C PD GaN charger can charge all the devices you carry with you every day, and charge them *fast*.

Features

- Engineered with GaN Technology
- 51% Smaller and 44% Lighter than an Original MacBook Pro Charger
- High-Power Charging for Laptops
- Fast Charging for iPhone, iPad, and Android
- Supports Samsung Super Fast Charging
- 65W USB-C Power Delivery with PPS
